

Description: A USB switcher, a flash drive, & two male to male USB cables solves the problem of a file transfer between two computers via cable connection without network connection or ethernet.

① View of setup

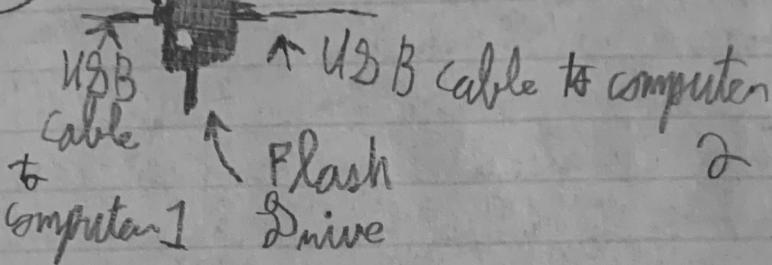

② View on computer 1:

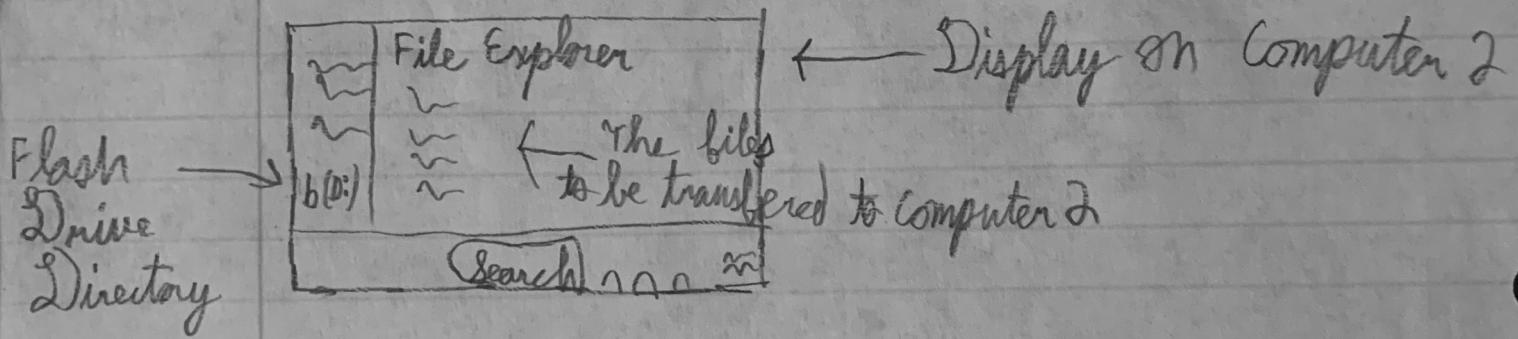

### USB Switcher

- ③ USB switcher switch

The switch will allow the 2nd computer to see the flash drive to complete the file transfer.

- ④ View on Computer 2:

- ⑤ Conclusion of Design: if a prototype works as desired, the design can be modified to be contained in a single package.
